

Poly-Classic Square Non-Tapered Columns Size Specification Tables

Poly-Classic column shafts are architecturally detailed and molded from fiberglass reinforced polymer.
Caps and bases are manufactured from low maintenance polyurethane.
CAD prints are available singly in PDF (email), DXF or DWG (email), FAX, or on drafting vellum (24" x 36") upon request.
Split columns and split/reassembled columns are NOT load bearing. Split plans and reassembly instructions are on page 19.
Columns should be painted. Please see installation instructions on page 16-19.
Hardware kits for column installation and reassembly of split columns are on page 6.
Pedestal base installs around square shaft, and does not increase overall height.

Pedestal Base	Base Width	Height
for 8" Square Plain Shafts	15"	42 1/2"

Column Shaft

Nominal Outside Width†	Inside Width‡	Number of Flutes	Width of Flutes	Tuscan Base					Tuscan Cap
