

# Poly-Classic® Column Heights

## When Using Ornamental Capitals

Ornamental capitals installed on Poly-Classic columns may alter the maximum possible height of the column when installed according to traditional architecturally correct styles.

For Roman Corinthian and Temple of Winds capitals, the shaft ends just above the neck ring. For other decorative caps, the shaft ends just above the cove/fillet (just below the neck ring.) See diagram at right for proper location at which to trim shaft.

This chart shows the maximum height possible if the shaft is trimmed according to the above specifications using capitals currently being provided. **Specifications are subject to change without notice.** Please call for most current information if exact height is critical.

Shaft Diameter	Shaft Height	w/ Tuscan Cap	w/ Greek Erechtheum	w/ Roman Ionic	w/ Scamozzi	w/ Temple of Winds	w/ Roman Corinthian
